MAX features equal MAX performance

Find more silver coins!

Waterproof to 10 feet (3 meters)

Dig deeper targets

• Built-in Z-Lynk™ Wireless Technology

Cut the cord! Integrated circuitry transmits audio to your wireless headphones. Six times faster than Bluetooth speed! Auto pairing. No cables, and no interference from other wireless devices.

• New Garrett MS-3™ Z-Lynk Wireless Headphones included

The speed of Z-Lynk Wireless Technology, and high-fidelity audio . . . with no cords attached!

• Maximum Detection Depth

Increased transmit power and enhanced electronics provides *AT Max* with significant depth increase.

• True All Metal Mode

Detects all types of metal and provides the greatest possible detection depth and sensitivity.

• Backlight: Illuminates LCD screen for improved visibility in low-light situations.

• Optimized Frequency

The *AT Max*'s 13.6 kHz operating frequency provides excellent detection on a wide range of targets—including silver coins, gold jewelry, and brass relics.

• High Resolution Ground Balance

Automatic and manually adjustable for improved performance. Includes 175 points of Ground Balance resolution, allowing the *AT Max* to handle both conductive soils (such as saltwater beaches) and highly mineralized ground.

• Automatic Ground Balance Window™

Garrett Exclusive feature will simultaneously ground balance to a range of values to help overcome localized ground variations. By reducing subtle ground responses, the Automatic Ground Balance Window smooths detector audio and allows the user to hear faint targets.

• Larger Display Numbers: Digital Target ID number, Iron Discrim number, etc.

• More Controls—All easily accessible with a single finger as you search.

AT MAX's other features include:

• Iron Audio™

Hear discriminated iron (normally silenced) to avoid digging tricky, undesired flat iron items.

• All Metal Iron Audio™

Garrett Exclusive feature that audibly identifies discriminated iron while operating in a True All-Metal Mode.

• Adjustable Frequency

Small frequency shifts to eliminate interference.

• All Terrain Versatility

Fully submersible to 10-foot (3 meter) depth. Weatherproof design also protects against dusty and humid environments. *For underwater use, optional wired headphones must be used.*

• Digital Target ID—0 to 99 scale.

• High-Res Iron Discrimination™

44 points of iron resolution.

• Adjustable Threshold

User can manually adjust the audio threshold (the constant background sound or "hum") to better hear faint targets.

• Pulse Width Modulation Audio

Proportional PWM audio response and Tone Roll Audio provide more target information and sharp, responsive target signals.

• Four Search Modes: True All-Metal, Custom, Coins, and Zero Discrim Modes.

• Fast Recovery Speed

• Notch Discrimination

• Coin Depth Indicator

• Battery Condition Indicator

• All Garrett AT searchcoils

are compatible: 4.5" SuperSniper, 5" x 8" DD coil, 6.5" x 9" concentric coil, 8.5" x 11" DD coil, and 9" x 12" concentric coil.
